
Skills demonstrated: controls assessment, compliance review, risk awareness, and security recommendations.

This project presents a completed internal security audit for Botium Toys, a fictional retail business with both physical and online operations. The audit reviews existing security controls, evaluates compliance best practices, identifies key gaps, and provides recommendations to reduce risk and improve the organization’s overall security posture.

Portfolio Activity

Botium Toys Internal Security Audit

Controls and compliance checklist

To complete the controls assessment checklist, refer to the information provided in the [scope, goals, and risk assessment report](#). For more details about each control, including the type and purpose, refer to the [control categories](#) document.

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently have this control in place?*

Controls assessment checklist

Yes	No	Control
	X	Least Privilege
	X	Disaster recovery plans
X		Password policies
	X	Separation of duties
X		Firewall
	X	Intrusion detection system (IDS)
	X	Backups

X	Antivirus software
X	Manual monitoring, maintenance, and intervention for legacy systems
X	Encryption
X	Password management system
X	Locks (offices, storefront, warehouse)
X	Closed-circuit television (CCTV) surveillance
X	Fire detection/prevention (fire alarm, sprinkler system, etc.)

To complete the compliance checklist, refer to the information provided in the [scope, goals, and risk assessment report](#). For more details about each compliance regulation, review the [controls, frameworks, and compliance](#) reading.

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently adhere to this compliance best practice?*

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
	X	Only authorized users have access to customers’ credit card information.
	X	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
	X	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
	X	Adopt secure password management policies.

General Data Protection Regulation (GDPR)

Yes	No	Best practice
	X	E.U. customers' data is kept private/secured.
X		There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
	X	Ensure data is properly classified and inventoried.
X		Enforce privacy policies, procedures, and processes to properly document and maintain data.

System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
	X	User access policies are established.
	X	Sensitive data (PII/SPII) is confidential/private.
X		Data integrity ensures the data is consistent, complete, accurate, and has been validated.
	X	Data is available to individuals authorized to access it.

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations: Botium Toys should first restrict access to sensitive data by implementing least privilege and separation of duties. The company should also encrypt cardholder data, deploy an intrusion detection system, create regular backups and a disaster recovery plan, and strengthen password requirements with a centralized password management system. Finally, Botium Toys should classify and inventory assets on a regular schedule so it can better support PCI DSS and GDPR compliance and reduce the risk of data breaches, downtime, and regulatory fines.
